Ndukeabasi Etim

Front end developer

Proactive Developer with a knack for front end software engineering. In my budding career, I've been integral to the successful execution of numerous projects. My ability to swiftly adapt to new technologies and environments has fostered efficient collaborations with cross-functional teams, resulting in high-quality products. Skilled in an array of front end and backend technologies, I'm passionate about delivering value to users and contributing to business growth. Highly motivated and results-driven, I'm eager to leverage my skills to create impactful digital solutions.

PERSONAL PROJECTS

Zuri Internship - https://internship.zuri.team/
- Collaborated with other backend team members to design and develop RESTful APIs using Node.js and Express.js.
- Contributed to the development of a scalable and maintainable database structure using MongoDB
- Applied validation and error handling to ensure data integrity and improve user experience.
- Implemented user authentication and authorization using JSON Web Tokens (JWT).

SchemeUp - Open Source Database Management toolkit (02/2023 - Present)
- Leveraged a pre-built design system to create and implement all modals for a project using Figma and React, ensuring consistency and improving user interface.
- Successfully developed and integrated an AI module on the backend for parsing SQL files, thereby enhancing data handling efficiency.
- Designed and executed the complete authentication system using Firebase, bolstering security and user management for the project.
